

Kristen Burford is a Principal Scientist in the medicinal chemistry department at Xenon Pharmaceuticals in Vancouver, BC. Her work there has focused on identifying and developing small-molecule modulators of voltage gated sodium channels in the CNS for the treatment of diseases in areas of high unmet medical need. Kristen obtained her PhD in organic chemistry from the University of Calgary in 2011 before moving on to a postdoctoral position at UC Berkely. She began her professional career at Pfizer in Groton, CT in 2013 and started working at Xenon Pharmaceuticals in 2015.
